

CUSTOM DESIGN

Monkeytoe Aluminium Structures

PRODUCT DESCRIPTION

Custom aluminium access structure for any hard-to-reach place, fully designed, engineered, manufactured and installed by Monkeytoe.

TYPICAL USES / APPLICATIONS

- Ideal where external access to roof is restricted
- Where room is limited to access space
- Mezzanine access
- Production Plants
- Commercial buildings ie. Hotel, apartments
- Power Stations
- Storage tanks
- Public access including bridges
- Ports/marine environments
- Container structures
- Elevated/suspended/bridged walkways

CHARACTERISTICS / ADVANTAGES

- All structures are manufactured from marine-grade aluminium, therefore non-corrosive.
- Aluminium structures are significantly lighter than comparable steel structures. Weight savings can be up to 40% for a single project.
- Being a more versatile material this allows for greater flexibility in design.
- Monkeytoe offer the full package from consultancy/compliance, to design/engineering, to manufacturing to the completed install.

TECHNICAL DATA / MATERIALS

- Stringers: T6 aluminium flat bar
- Stair treads: T6 aluminium extrusion
- Stanchions: T6 aluminium RHS extrusion
- Handrails: T6 aluminium extrusion
- Fixings (bolts, tek screws): – 304 grade stainless steel
- Various aluminium support members: T6 aluminium extrusion

TESTS

APPROVALS / STANDARDS

- Accordance with relevant sections of AS/NZ 1657
- Building B1 structure code
- OHS codes of practice standard/guidelines
- D1 – Access routes

WARRANTY

- 25 years materials and 2 years install

INSTALLATION

- Installation works must be carried out only by Monkeytoe or instructed/approved contractors

MAINTENANCE

- Self cleaning when used in outdoor situations
- General cleaning recommended in conjunction with standard building / plant cleaning programme or policy
- No certified maintenance is required that affects lifespan or performance of product

CUSTOM DESIGN PROCESS Monkeytoe is able to bridge the gap between engineers, architects and other parties, to ensure a compliant and fit-for-purpose solution is taken from design to installation.

STEP ONE

Initial Consultation

We provide a consultation – either on-site or at your office. From there, we visit the site when required or work directly from plans and sketches.

STEP THREE

Design Finalised

When the design is finalised, we provide a fixed cost for manufacture and installation – or, if you're prepared to proceed from the proposal, we will cover any small changes as a variation.

STEP TWO

Concepts & Costings

We develop the design concept and supply a cost estimate for approval. This starts the design and documentations process.

STEP FOUR

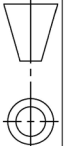

Lead Times

You place the order, and we then provide accurate lead times for manufacture and installation.
