

SCREENING OPTIONS.

Louvres | Acoustic | Slat

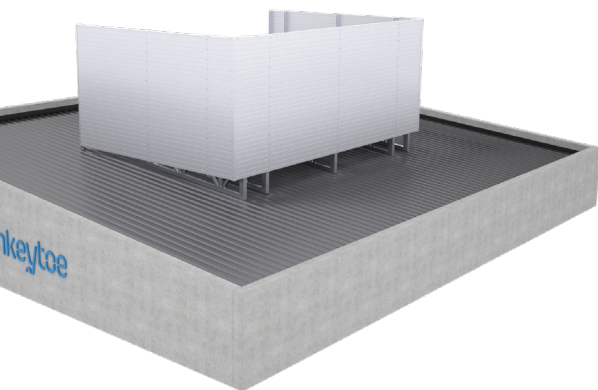

All screening options integrate perfectly with aluminium plant platforms, or as separate screening units, and can be powder-coated to suit the aesthetics of any building.

ALUMINIUM LOUVRES.

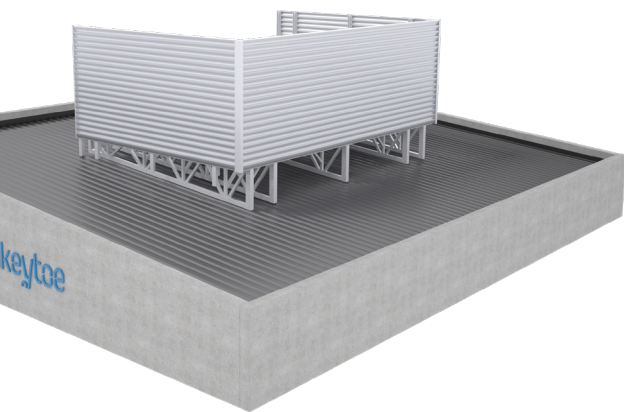

Proprietary aluminium blade louvres to hide unsightly plant and building elements and improve architectural requirements. For acoustic louvres, see the below louvre-look HushMonkey option.

HUSHMONKEY ACOUSTIC BARRIER.

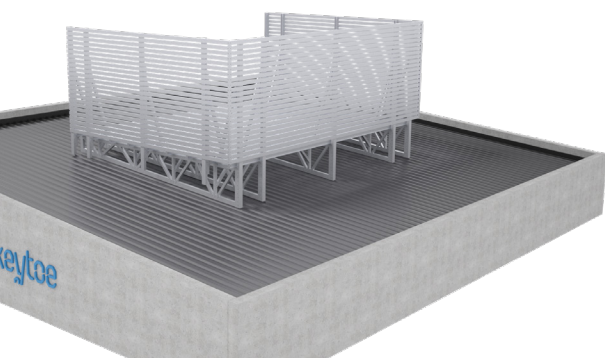

Reflective - A proprietary HushMonkey sound-reflective panel, which has an Rw rating of 26dB.

Absorptive - A proprietary HushMonkey panel with an absorptive core, which has an NRC rating of 0.7Hz

LOUVRE-LOOK HUSHMONKEY.

This proprietary aluminium screening option reflects the same acoustic properties as the standard HushMonkey screening, however with the appearance of our aluminium louvres. This is available as a reflective or an absorptive barrier as per standard look HushMonkey.

SLAT SCREENING.

Proprietary aluminium slats as an alternative to blade louvres. Used to hide unsightly plant and building elements and improve architectural requirements.
